

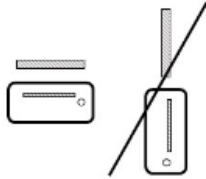

## Photo instruction – how to create good images

### Image requirements

- Use holder whenever possible, any box will do
- Complete strip must be on the image (both ends)
- Strip must be well focussed
- Strip length on the image must be 50% of the screen width

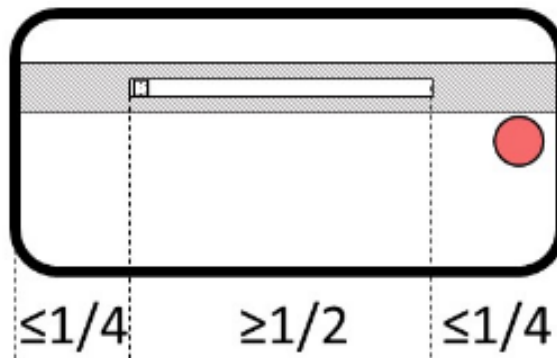

### When taking photo by hand

- Hold camera horizontally
- Strip parallel to the long side of the screen

### Light recommendations

- Use sufficient light
- Avoid shadows on the image
- Try flash in case you can not ensure good light otherwise

Please use background on page 2
